

KPI Definitions: -

- **Total Revenue:** Total sales generated during the period.
- **Total Profit:** Total profit earned after deducting costs from sales.
- **Profit Margin:** Percentage of the revenue retained as profit.
- **Total Quantity Sold:** Total number of units sold (across all products).

Key Insights: -

- The business generated a total revenue of ₹7.17 million and a total profit of ₹1.13 million during the period.
- The average profit margin was 15.79%, indicating healthy profitability across product categories.
- Furniture was the highest contributing category, accounting for 41.62% of total revenue.
- Office Chair was the best-performing product (by revenue), followed by Notebook and Desk.
- West region generated the highest profit (₹0.31M), while East generated the lowest profit (₹0.25M).
- Sales peaked in March and declined significantly in June, indicating possible seasonal demand fluctuations.

Business Recommendations: -

- Increase marketing and inventory allocation for high-performing products such as Office Chair, Notebook and Desk.
- Expand successful sales strategies used in the West and South regions to improve profitability in other regions.
- Investigate factors contributing to the decline in sales during June and implement corrective measures to maintain consistent growth.
- Focus on the Furniture category, as it contributes the largest share of revenue and offers strong business potential.
- Monitor low-performing products and identify opportunities for pricing, promotion or product improvements.
